

**Baseplate Installation Instructions** 

# BX1971 2005-07 Dodge

# Dakota

Installation Instructions

Please read BOTH these Installation Instructions and the General Instructions before attempting to install or operate this equipment.

- Blue Ox<sup>®</sup> towing products and accessories are intended to be installed by Blue Ox<sup>®</sup> Dealers who are familiar with our products and have the equipment necessary and knowledge to do "fit work". When necessary Blue Ox<sup>®</sup> Dealers can be found at www.blueox.com or by contacting our Customer Care Department at (402) 385-3051.
- Many Blue Ox<sup>®</sup> Baseplates are designed to use existing holes and hardware to mount the baseplate to the towed vehicle. Even though bolts are there, do not assume they are adequate for baseplate mounting. Always use hardware supplied in the hardware kit and existing hardware specified in the Baseplate Installation Instructions.

Confirm the towability and pre-towing procedures for your vehicle with the owner's manual or contact the vehicle's manufacturer for specific towing procedures.

lf the front of your vehicle looks different than this, call us at (402) 335-3051.

#### **Bolt Torque Specifications**

Torque in Foot-Pounds for Metric Bolts

Bolt Size	Grade 8.8	Grade 10.9		
6MM	6	8		
8MM	16	22		
10MM	31	40		
12MM	54	70		
14MM	89	117		

#### **Bolt Torque Specifications**

Torque in Foot-Pounds for Inch Bolts

Bolt Size	Grade 5	Grade 8
1/4"	10	14
5/16"	19	29
3/8"	33	47
7/16"	54	78
1/2"	78	119
5/8"	154	230

# **A WARNING**

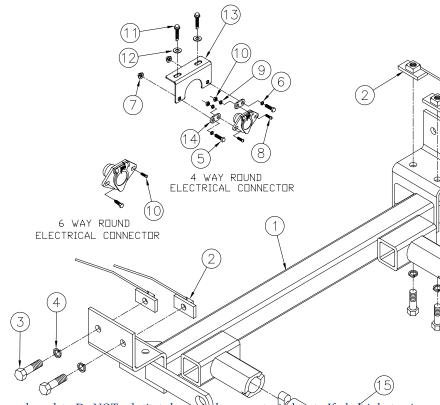

Failure to read and follow these instructions could result in separation of the towed vehicle from the tow bar, causing property damage, loss of towed vehicle, personal injury or death.

## **Parts List**

Ref. No.	Qty.	Part #	Description
1	1	61-6086	Weldment, Baseplate, BX1971
2	8	61-4604	1/2-13 Nutplate, with 14" Wire
3	8	201-0051	1/2-13 x 1 1/2" Hex Bolt, Grade 5, ZP
4	8	203-0012	1/2" Lock Washer, ZP
5	2	201-0071	1/4-20 x 1" Hex Bolt, Grade 5, ZP
6	2	203-0008	1/4" Lock Washer, ZP
7	2	202-0069	1/4" Whiz Nut, ZP
8	2	201-0192	#10-32 x 1/2" Slot, Rd. HD. Screw
9	2	203-0054	#10 Lock Washer
10	2	202-0047	#10-32 Hex Nut
11	2	201-0654	#10-16 x 1" Self Driving Screw, ZP
12	2	203-0001	1/4" Flat Washer, ZP
13	1	101-6135	Electrical Bracket
14	2	101-5822	Adapter, 4 Way Connector
15	2	62-3469	Attachment, Assembly, SF/LB (R)
	2	226-0046	Baseplate Safety Cable, 36" CL III (Not Shown)
	2	229-0359	Quicklink, 3/8, ZP (Not Shown)
	2	290-0437	Cap Plug, Black (Not Shown)

18MM Socket 3/4" Socket 3/8" Socket 5/16" Nut Driver 17/32" Drill Bit 30 Torx Large Vise Grips LOCTITE Red

#### **Important:**

Use only genuine factory replacement parts on your baseplate. Do NOT substitute homemade or non-typical parts. If a bolt is lost or in need of replacement, for your safety and the preservation of your baseplate, be sure to use a replacement bolt of the same grade (In most cases it will be Grade 5, please reference the parts list above). Replacement parts may be ordered through your nearest Blue  $Ox^{\circ}$  Dealer or Distributor, or call our Customer Care Team at (402)385-3051. Failing to follow and/or altering these installation instructions in either installation or required equipment will void the manufacturer's warranty. Towing behind a non-motorized vehicle will void the warranty. Page 2 of 6 292-2662 Rev. C 4/6/10

## **Removable Tab:**

Motorhome mount tow bars are recommended for use with this baseplate. Due to the design of the removable tabs, the RangeFinder II, Adventurer, and Ambassador tow bars can not be used. The Acclaim tow bar may be used, but will not fold and store on the front of the vehicle. Adapters, except the BX8833 and the BX88151, can not be used with this baseplate.

### **Instructions:**

The front bumper is removed and reinstalled for the baseplate installation. Drilling is required. Trimming of the air dam is required. Factory tow hooks must be removed and will remain off the vehicle after installation.

The dimensional variations between otherwise identical vehicles can be considerable. While the baseplate was designed for easy installation, it may be necessary to tailor the baseplate slightly to compensate for auto manufacturer's tolerances. These minor adjustments may include filing a hole slightly, bending electrical rods or bending end plates.

The BX8848, 4 Diode wiring kit is recommended for this vehicle.

Handling of some cosmetic parts when installing this product may require the use of protective covers, rags, specialty tools, etc. to prevent damage.

### **Installation Instructions**

 Using the 30 torx, remove three metric bolts from the edge of the wheel well, just forward of the front tire. Set the metric bolts aside to be reinstalled later. Do this to both sides of the vehicle.

2. Remove the pushpin from the lower edge of the fascia just below the license plate. Set the pushpin aside to be reinstalled later. Do this to both sides of the vehicle.

 Using the 18MM socket, remove four metric nuts. Located just behind the metal bumper, on the frame end. Set the metric nuts aside to be reinstalled later. Pull the metal bumper forward, unplug the electrical connections and set the metal bumper aside to be reinstalled later.

4. Measure and mark a horizontal line, 8" back from the lower front edge of the air dam, as indicated by the white arrow in the photo above, mark a horizontal line 2 1/2" below the first line and cut out the area with a utility knife. Do this to both sides of the vehicle. This will allow the baseplate to slide onto the frame rail.

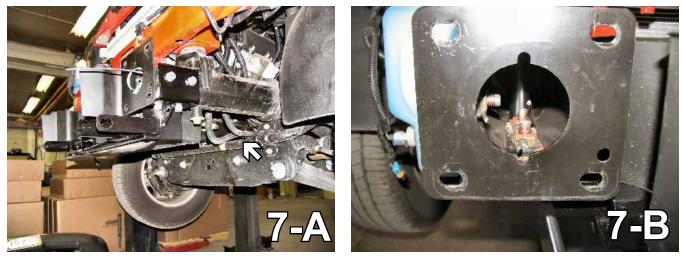

5. Slide the baseplate onto the frame rail to align forward side hole with existing hole in the frame and clamp in place with the vise grips. Do this to both sides of the vehicle. Insert the nutplate into the end of the frame rail to align with the existing hole, tighten the 1/2-13 x 1 1/2" hex bolt and lock washer with the 3/4" socket. Do this to both sides of the vehicle. Note: Some models may not have existing holes in frame. Slide baseplate forward and just behind the dimple in frame end (white arrow) and clamp in place with vise grip.

 Using the baseplate as a template, drill the remaining three holes with the 17/32" drill bit. Do this to both sides of the vehicle.

When using power drills be aware of the dangers of torque and drill bit length.

7. Insert the nut plates into the frame rail to align with the drilled holes, tighten the 1/2-13 x 1 1/2" hex bolts and the lock washer with the 3/4" socket into the nutplates. Do this to both sides of the vehicle.

BE SURE TO USE LOCTITE® RED ON ALL BOLTS BEFORE TIGHTENING. TIGHTEN ALL BOLTS ACCORDING TO THE TORQUE CHART ON THE FRONT PAGE OF THESE INSTRUCTIONS OR ON PAGE 3 OF THE BASEPLATE TOWING GENERAL INSTRUCTIONS. 8. Reinstall the metal bumper. Be sure that all electrical connections are plugged in properly.

Install the tow bar and safety cables according to the instructions included in their packages.

Do not substitute other devices if the tow bar pin and clip are lost.

**DEALER OR INSTALLER:** BE CERTAIN THE USER RECEIVES THE INSTRUCTION SHEETS.

Shown with Removable Tabs Installed.

If the baseplate is in an accident, it must be replaced. DO NOT use it again! An accident can cause unseen damage and using it again could result in more damage or serious injury. DO NOT use the baseplate if it is damaged or missing parts.

#### **CUSTOMER SERVICE COMMITMENT**

Blue Ox is committed to providing you with exceptional customer care throughout your lifetime with our products. Our team is here to assist you with any questions you may have regarding the performance of your product. Simply call 1-800-228-9289 and you can speak with our customer care team.

Additionally, please visit our website to see which rallies our Destination America team will be attending. For a nominal fee, our service technician will service your towing system to ensure it's in proper working condition. Also as a commitment to our customers, should you visit our factory you can stay at our full service Blue Ox campground at no charge along with enjoying a factory tour.

Again thank you for being our customer and for the confidence you have shown in the performance of our products. It is because of customers like you we enjoy the success we have today.

## **General Information**

- Ensure that your product(s) are registered online at www.blueox.com. It is crucial to register your product(s) so that you may be alerted of product offerings, updates, upgrades, maintenance and safety bulletins, and/ or recalls.
- 2. It is the owner's responsibility to inspect all towing equipment for cracked welds, missing or worn parts and loose bolts before each towing trip. Be sure to use Loctite<sup>®</sup> Red on all bolts and tighten to the recommended specifications.
- 3. It is the owner's responsibility to hook up all towing equipment per manufacturer's instructions/ recommendations.
- 4. Remove the attachment tabs when not in use (if applicable).

### Notice To Baseplate Installer

#### 1. It is YOUR responsibility to watch for:

- Oil cooler and air conditioner lines
- Electrical wires and hoses
- Missing parts or attaching points on the frame

\*\* If the baseplate is improperly installed and is against a wire or hose, it could cause fluid leaks or electrical shorts some time after the actual baseplate installation.

#### Permanent Baseplate Safety Cable Installation

Permanent baseplate safety cables are strongly recommended when towing a vehicle with a tow bar. The principle function of the permanent baseplate safety cables is to prevent the towed vehicle from breaking loose in the event the connection between the frame of the towed vehicle and the baseplate fails or becomes disconnected. The cables must be connected from the baseplate to the frame rail or cross member of the vehicle's frame. The illustrations below show the possible arrangements recommended by Blue Ox®. Each permanent baseplate safety cable must have an adequate weight rating for the towing system. The weight rating of the two (2) cables together will not qualify.

#### Do not mount the permanent baseplate safety cables against wires, hoses or brake lines.

These permanent baseplate safety cables should remain installed as long as the baseplate is installed on the vehicle. Permanent baseplate safety cables are to be used in conjunction with, and NOT a replacement for legally required safety cables attaching the towed vehicle to the towing vehicle.
