Installation Instructions

Removable Tab:

Due to the design of the removable tabs, the RangeFinder II and Ambassador tow bars can not be used. Adapters, except the BX8833 and the BX88151, can not be used with this baseplate.

Instructions:

The fascia, bumper, air baffle and washer reservoir, bolts and push pins are removed and reinstalled for the baseplate installation. Drilling is required. Trimming is required.

The dimensional variations between otherwise identical vehicles can be considerable. While the baseplate was designed for easy installation, it may be necessary to tailor the baseplate slightly to compensate for auto manufacturer's tolerances. These minor adjustments may include filing a hole slightly, bending electrical rods, and/ or bending end plates.

The BX8869, Bulb & Socket Wiring Kit is recommended for this vehicle.

Installation Instructions

1. Remove the four push pins on the top side of the fascia. Set aside to be reinstalled later.

2. Remove the nine metric bolts from the lower edge of fascia all the way around with the 7MM socket. Set aside to be reinstalled later.
