

Please read BOTH these Installation Instructions and the General Instructions before attempting to install or operate this equipment.

- 1. Blue Ox<sup>®</sup> towing products and accessories are intended to be installed by Blue Ox® Dealers who are familiar with our products and have the equipment necessary and knowledge to do "fit work". When necessary Blue Ox® Dealers can be found at www.blueox.com or by contacting our Customer Care Department at (402) 385-3051.
- 2. Many Blue Ox<sup>®</sup> baseplates are designed to use existing holes and hardware to mount the baseplate to the towed vehicle. Even though bolts are there, do not assume they are adequate for baseplate mounting. Always use hardware supplied in the hardware kit and existing hardware specified in the Baseplate Installation Instructions.

Confirm the towability and pre-towing procedures for your vehicle with the owner's manual or contact the vehicle's manufacturer for specific towing procedures.

Do not use the towed vehicle for storing luggage, equipment, etc. This may cause you to exceed the towing capacity of the tow bar, baseplate, and its accessories.

If the front of your vehicle looks different than this, call us at (402) 385-3051.

Attachment Tab Height: 13 1/2"

Attachment Tab Width: 26" Serial Number

<b>Bolt Torque Specifications</b> Torque in Foot-Pounds for Metric Bolts

			6 WAY ROUND ELECTRICAL CONNECTOR

#### Important:

Use only genuine factory replacement parts on your baseplate. Do **NOT** substitute homemade or non-typical parts. If a bolt is lost or in need of replacement, for your safety and the preservation of your baseplate, be sure to use a replacement bolt of the same grade (In most cases it will be Grade 5, please reference the parts list above). Replacement parts may be ordered through your nearest Blue Ox® Dealer or Distributor. Failing to follow and/or altering these installation instructions in either installation or required equipment will void the manufacturer's warranty.

(13)

**Vehicle Weight:** Due to the design of the removable tabs, the RangeFinderII and Ambassador tow bars can not be used. Adapters, except the BX8833 and BX88151, can not be used with this baseplate.

**Installation Notes:** The fascia, guard, washer reservoir, bolts, push pins and screws are removed for installation. Drilling is required. Trimming is required.

The dimensional variations between otherwise identical vehicles can be considerable. While the baseplate was designed for easy installation, it may be necessary to tailor the baseplate slightly to compensate for auto manufacturer's tolerances. These minor adjustments may include filing a hole slightly, bending electrical rods or bending end plates.

The BX8848 4-Diode Wiring Kit is recommended for this vehicle.

Do not use the towed vehicle for storing luggage, equipment, etc. This may cause you to exceed the towing capacity of the tow bar, baseplate, and its accessories.

Handling of some cosmetic parts when installing this product may require the use of protective covers, rags, specialty tools, etc. to prevent damage.

### **Installation Instructions:**

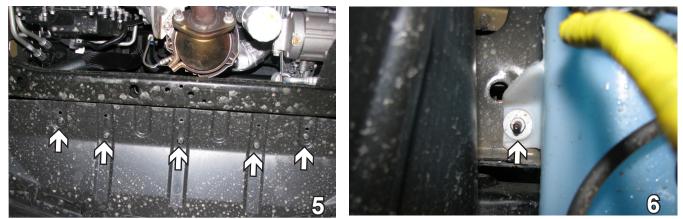

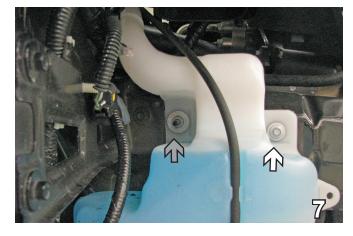

- 1. Using a 10mm socket, remove two metric bolts from the plastic on top of the fascia. Also remove the one push pin at the top center. Using a Phillips screwdriver, remove the four screws from around the edge (grey arrows). Do this to both sides of the vehicle. Set bolts, push pins and screws aside to be reinstalled later.
- 2. Using a Phillips screwdriver, remove three screws, located just forward of the front tire. Do this to both sides of the vehicle. Set screws aside to be reinstalled later.

- 3. In the corner forward of the front tire, remove the push pin. Do this on both sides. Set push pins aside to be reinstalled later.
- 4. Underneath the vehicle in front of the tire, using a 8mm socket remove the bolt in the corner. Do this on both sides. Set the bolts aside to be reinstalled later.

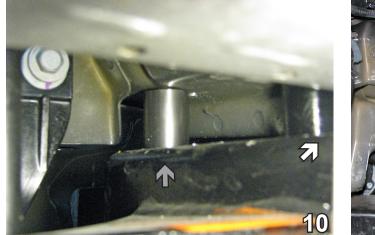

- 5. Underneath the vehicle across the middle, remove five push pins. Set push pins and the plastic guard aside to be reinstalled later.
- 6. On the passenger side in order to remove the washer reservoir, remove the two bolts from the left side using an 11mm socket. (Second bolt located on Step 7 gray arrow.) Set bolts aside to be reinstalled later.

7. Continuing with the washer reservoir, use an 8mm socket to remove the top right metric bolt which will not be reinstalled. Unplug everything and completely remove. Plug the hoses to avoid losing the fluid. Set the washer reservoir aside to be reinstalled.

- 8. Under the front bumper, using a hack saw blade cut the piece of plastic flush with the bottom of the bumper. Using a flat screwdriver, remove the push pin (gray arrow). Do this on both sides. Remove the plastic and discard pieces and pins, they will not be reused.
- 9. Slide the base plate straight up from the bottom and clamp.

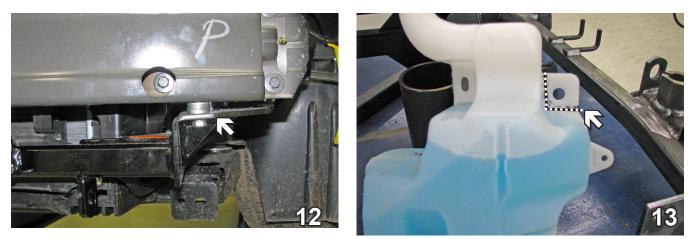

- 10. Underneath the base plate, drill the front hole (white arrow) using a 13/32" drill bit. Start a 3/8"-16 x 2 1/2" bolt in the hole. Drill the two remaining holes. Use 3/8"-16 x 2 1/2" bolt for the back hole (gray arrow). They both need 3/8" lock washers and 3/8" nut plates, tighten with Loctite Red. Do the same on both sides of the vehicle.
- 11. Be sure the base plate is level across the top, and up as far as possible. Both holes need to be drilled with a 13/32" drill bit. First drill a hole across the side and start a 3/8"-16 x 1 1/4" bolt with a 3/8" lock washer and a 3/8" nut plate. Continue with the second hole. Do this to both sides. Tighten with Loctite Red.

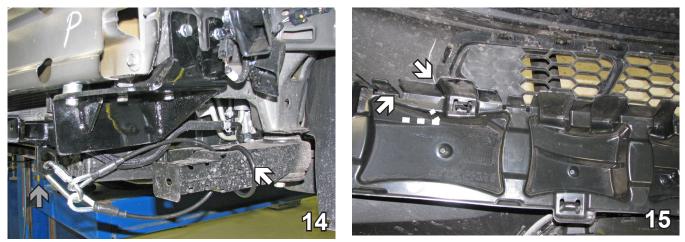

BE SURE TO USE LOCTITE® RED ON ALL BOLTS BEFORE TIGHTENING. TIGHTEN ALL BOLTS ACCORDING TO THE TORQUE CHART ON THE FRONT PAGE OF THESE INSTRUCTIONS OR ON PAGE 3 OF THE BASEPLATE TOWING GENERAL INSTRUCTIONS.

When using power drills be aware of the dangers of torque and drill bit length.

405-0108 Rev D

- 12. Insert a 3/8-16 x 2" bolt with a 3/8" lock washer into the front hole. Add as many 3/8" flat washers as necessary to keep the base plate level and attach 3/8" nut plate. Do this on both sides. Tighten with Loctite Red.
- 13. On the passenger side before reinstalling the washer reservoir, using a hack saw blade cut off the top right installation tab about 1 1/2"x 1 1/2" (see dotted line). Be careful not to cut into reservoir. Reinstall the water tank and connect the hoses and plug in electrical connections.

- 14. Attach the permanent baseplate safety cables to the provided convenience link on the baseplate (see grey arrow). The photo above shows the recommended installation of the cables to frame of vehicle (see white arrow). Additional options may interfere with suggested mounting; in this case secure the cables to a solid piece of the frame as described in the instructions included with the permanent baseplate safety cables. Be sure the safety cables do not rub against any hoses or moving parts. Do this to both sides of the vehicle.
- 15. On the back side of the fascia, using a hack saw blade trim the plastic piece as shown. Do this on both sides.
- 16. Reinstall fascia, guard, bolts, push pins and screws. The installation of the baseplate is complete.

Install the tow bar and safety cables according to the instructions provided in their packages. When demonstrating this to the customer, be sure to include all the contents and packages.

Do NOT substitute other devices if the tow bar pins and clips are misplaced.

DEALER or INSTALLER: Be certain the user receives the instruction sheets for their products.

Be sure that **ALL** electrical connections are plugged in properly and functioning **BEFORE** installing the fascia.

**CUSTOMER SERVICE COMMITMENT** 

Blue Ox is committed to providing you with exceptional customer care throughout your lifetime with our products. Our team is here to assist you with any questions you may have regarding the performance of your product. Simply call (402) 385-3051 and you can speak with our customer care team.

Additionally, please visit our website to see which rallies our Destination America team will be attending. For a nominal fee, our service technician will service your towing system to ensure it's in proper working condition. Also, as a commitment to our customers, should you visit our factory, you can stay at our full service Blue Ox campground at no charge along with enjoying a factory tour.

Again, thank you for being our customer and for the confidence you have shown in the performance of our products. It is because of customers like you we enjoy the success we have today.

If the baseplate is in an accident, it must be replaced. DO NOT use it again! An accident can cause unseen damage and using it again could result in more damage or serious injury. DO NOT use the baseplate if it is damaged or missing parts.

### **General Information**

- Ensure that your product(s) are registered online at www.blueox.com. It is crucial to register your product(s) so that you may be alerted of product offerings, updates, upgrades, maintenance and safety bulletins, and/ or recalls.
- 2. It is the owner's responsibility to inspect all towing equipment for cracked welds, missing or worn parts and loose bolts before each towing trip. Be sure to use Loctite<sup>®</sup> Red on all bolts and tighten to the recommended specifications.
- 3. It is the owner's responsibility to hook up all towing equipment per manufacturer's instructions/ recommendations.
- 4. Remove the attachment tabs when not in use (if applicable).

#### Notice To Baseplate Installer

#### 1. It is YOUR responsibility to watch for:

- Oil cooler and air conditioner lines
- Electrical wires and hoses
- Missing parts or attaching points on the frame

\*\* If the baseplate is improperly installed and is against a wire or hose, it could cause fluid leaks or electrical shorts some time after the actual baseplate installation.

#### Permanent Baseplate Safety Cable Installation

Permanent baseplate safety cables are strongly recommended when towing a vehicle with a tow bar. The principle function of the permanent baseplate safety cables is to prevent the towed vehicle from breaking loose in the event the connection between the frame of the towed vehicle and the baseplate fails or becomes disconnected. The cables must be connected from the baseplate to the frame rail or cross member of the vehicle's frame. The illustrations below show the possible arrangements recommended by Blue Ox®. Each permanent baseplate safety cable must have an adequate weight rating for the towing system. The weight rating of the two (2) cables together will not qualify.

#### Do not mount the permanent baseplate safety cables against wires, hoses or brake lines.

These permanent baseplate safety cables should remain installed as long as the baseplate is installed on the vehicle. Permanent baseplate safety cables are to be used in conjunction with, and NOT a replacement for legally required safety cables attaching the towed vehicle to the towing vehicle.
