6	1	D-55001	1 1/4" CURT BALL MOUNT
7	1	F-4	1/2" DIA. PIN & CLIP

HITCH WEIGHT: 16 LBS.
INSTALL TIME: 45 MINUTES
INSTALL NOTES:
DRILLING REQUIRED

INSTALLATION STEPS

- 1) Remove the spare tire and the contents of trunk area. Note: some late models have an "emissions" charcoal canister in the spare tire well. If after removing the tire, there is a dome shaped cover exposed, remove retaining nuts and dome, carefully block canister up from floor for drilling holes. **(Note: On M3 models trim facia and retainer as necessary to clear vertical hitch plate before installation.)**
- 2) At the rear bumper, remove the lower bumper facia panel only. It will release at clips (and screws on M3). Position the hitch on car as shown, with hitch level and square with the car. Hitch tail bracket will fit between tire well ribs. Use hitch as a template to mark and drill the mounting holes.
- 3) Fasten hitch to car as shown using the previously drilled holes.
- 4) From inside the car drill the remaining holes needed using the mounting plate and backing plate as templates. When drilling is complete install fasteners as shown.
- 5) Torque all hardware to 30 lb.-ft. Reinstall all components that where previously removed for hitch installation.

PERIODICALLY CHECK THIS RECEIVER HITCH TO INSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.

Curt Manufacturing Inc., warrants this product to be free of defects in material and/or workmanship at the time of retail purchase by the original purchaser. If the product is found to be defective, Curt Manufacturing Inc., may repair or replace the product, at their option, when the product is returned, prepaid, with proof of purchase. Alteration to, misuse of, or improper installation of this product voids the warranty.
