INSTALLATION WALKTHROUGH:

Parts List

ITEM	QTY	PART NUMBER	DESCRIPTION
1	4	0125853	.234" PLASTIC RIVET
2	4	0125842	.246 PLASTIC RIVET

1. Lower exhaust by removing 2 rubber isolators.

2. Lightly twist electrical sensor from the bumper mount clip and set aside.

INSTALLATION WALKTHROUGH:

3. Remove (1) plastic rivet each side of the underside of the bumper cover by using a pair of side cutters and cutting off the top of the rivet. Discard removed rivets.

4. Remove (2) 7mm bolts from each side of the wheel well that secure the bumper fascia.

5. Remove the first (2) plastic rivets above the 7mm bolts previously removed, by pushing the center of the rivet through with a small punch and prying the head of the rivet out with a flat head screw driver.

6. Lightly pull the plastic fender flare back on each side exposing an 8mm bolt and the reflector light wiring. Unbolt the 8mm bolt with a wrench and disconnect the reflector light and let hang.

INSTALLATION WALKTHROUGH:

7. Remove the (2) 10mm bolts from under the rear hatch securing the bumper fascia.

8. Remove (4) 10mm plastic nuts from the bumper braces on the underside of the vehicle as shown.

9. To remove bumper cover, gently pull each side of the bumper fascia rearward of the vehicle and set bumper cover aside. (Models with reverse sensors will need to disconnect (4) connectors)

10. Remove the (6) 15mm flange nuts attaching the bumper to the vehicle, remove bumper and set aside.

INSTALLATION WALKTHROUGH:

11. Attach hitch to vehicle so that the hitch will be sandwiched between the frame and the bumper. Reuse the 15mm flange nuts on the (6) frame studs to secure the hitch and the bumper. Torque 15mm hardware to 35 lb-ft.

12. Trim center of bumper fascia as shown approximately 2 1/4" wide by 4 1/2" long.

13. Reinstall the bumper cover by following the disassembly steps 1-10 in reverse. Replace (6) removed plastic rivets with those supplied in the hardware kit attach using a plasticrivet gun.

14. Installation complete.
