English

1. Locate the vehicle's factory tow harness connector's they will be located under the vehicle (A). Remove the protective caps (B). Insert the ends into their mating connectors. Make sure they are fully inserted with locking tabs in place (C).

2. Adhere the black converter box to the underside of the vehicle in a secure out of the way location using the double sided tape provided. Find a flat, clean surface that is out of the path of road spray from the tires.

3. Route the 4-flat to the center of the vehicle's bumper and secure using cable ties provided.

4. Insert the 10 AMP fuse provided into the inline fuse holder to complete the install.

WARNING:

Mount converter module inside the tow vehicle or in a protected area similar to a vehicle interior. Failure to mount the module in a protected area can cause loss of warranty, product failure including lamp malfunction, overheating and potential fire.

IMPORTANT: Battery connection must be fuse protected, 10 amp max. Exceeding the product rating can cause loss of warranty, overheating and potential fire. Do not exceed lower of tow vehicle lamp load rating or:

Signal circuits – 3.0 amps per side
Tail / Running Lights – 6.0 amps total

Check vehicle owner's manual or contact vehicle manufacturer for more information.
